

July 31, 2012

Dear Lake Lot Licensee,

On July 19, 2012 the City of Weatherford Code Enforcement officers inspected all lake lot docks and associated structures located in Lake Weatherford. Several of these structures were found to be noncompliant in accordance to the rules and regulations applicable to Weatherford Water Supply Reservoir lots.

Attached you will find a copy of the amended 2009 Weatherford Water Supply Reservoir Rules and Regulations to assist you with bringing your docks and associated structures into compliance.

Code Enforcement will visit Lake Weatherford for reinspection in January of 2013. At that time, citations may be issued to the licensee for docks and associated structures that are noncompliant.

Should you need additional information or further assistance, please contact Code Enforcement at 817-598-4485. We appreciate your cooperation in this matter.

Sincerely,

A handwritten signature in black ink that reads 'Steve Bates'.

Steve Bates
Director of Municipal & Community Services
